management of construction introduces all aspects of management practice to students and

professionals based in the construction industry it is also important for those involved in allied fields such as design project development and site monitoring and inspection the book addresses each stage of the construction project from conception to completion giving a perspective on the whole life cycle often missing from textbooks the author also balances engineering concerns with the human resource and personal aspects of construction management that are so important to the successful outcome of a project

clients have been identified as critical for building delivery but have been under researched with only a few studies about them this book seeks to address this gap a deeper look into the nature of construction clients and their relation to building users exposes more fundamental questions related to the activity of building and the activity in the building these fundamental questions include how do clients get what they want how do clients cope with the building process and how are clients being shaped by building s this book on clients and users is structured around three main themes agency is concerned with the classical agency structure dichotomy on actions roles and responsibilities or put differently whether actors can act freely or are bound by structural constraints governance is related to the interplay between clients and the supply system clients govern the supply system but are at the same time governed by the supply system through different processes and mechanisms innovation deals with construction innovation and what part clients and users play in this struggle between change and stability the book includes theoretical and conceptual frameworks on what constitutes clients and users as well as case studies on r d themes of relevance to practice

how can innovation in the construction industry be strengthened what instruments and approaches are being used by governments to promote it what works and under what circumstances these key questions have profound implications this book presents a framework for the analysis of innovation models and systems in construction and an international comparison of these systems with a focus on their application in practical policy development

this set of proceedings is based on the international conference on advances in building technology in hong kong on 4 6 december 2002 the two volumes of proceedings contain 9 invited keynote papers 72 papers delivered by 11 teams and 133 contributed papers from over 20 countries around the world the papers cover a wide spectrum of topics across the three technology sub themes of structures and construction environment and information technology the variety within these categories spans a width of topics and these proceedings provide readers with a good general overview of recent advances in building research

the 1992 census of construction industries covers all employer establishments establishments with payroll primarily engaged in contract construction or construction on their own account for sale as defined in the standard industrial classification manual 1987 sic general contractors in both the building and the heavy construction field usually assume responsibility for an entire construction project but may subcontract to others all of the actual construction work or those portions of the project requiring special skills or equipment special trade contractors may work

for general contractors for other subcontractors or may work directly for the owner of the property each establishment receiving a questionnaire was requested to report the percent of total dollar value of business done for each kind of business activity engaged in during 1992 this information was used for the computer assignment of appropriate industry classifications during this work various tests were also made using other data reported on the questionnaire the proportion of construction work to total business was checked to verify that the establishment was primarily in construction also taken into consideration were the types of structures worked on during the year and the extent of work undertaken for other contractors construction establishments often engage in various construction activities it is necessary however to assign a single industry code to the establishment based on its major activity therefore the statistics shown for an industry reflect not only the primary activity of the establishments in the industry but also their secondary activities the industry reports however do present data on the extent of secondary activities
